### Hot Car Temperatures Can Kill Your Dog

We understand you meant to be kind by taking your dog with you today, but you could be risking their life.

Warm weather can kill a dog left in a car.

An 80 degree day, even with windows slightly open, the temperature inside a car can reach **102 degrees in 10 minutes**, and 120 degrees in just half an hour.

**Even 70 degrees** is too hot to leave your dog in a car if the sun is shining.

Leaving your dog for “just a minute” may be too long. A dog’s normal body temperature ranges from 101 to 102.5 degrees.

Dogs can with stand a body temperature of 107-108 degrees for only a very short time before suffering brain damage or death.

If overcome by heat, immediately soak the dog with water and seek veterinary care.
